The smart presentation
IT company

E! Manager

An online set of tools to assist speakers, congress organisers and event managers before, during and after an event.

- Virtual environment to manage an event
- Manage up-to-date information from any location
- Speakers can upload presentations prior to an event
- PCOs can review the agenda
- PCOs can manage break slides
- Moderate twitter feeds before they go 'live' via E! Signage
- E! Manager continuously evolves with new online tools

E! Centre

A physical meeting point at the venue where speakers upload, edit and test their presentations and organisers make last minute changes.

- Custom scaled Speaker Service Centre
- Work on presentations in a quiet and fully equipped environment
- Full technical support to help with presentations
- Powerful video conversion and editing capabilities
- Local storage and distribution of all presentations linked to the agenda
- Practice the presentation at a demo lectern
- Always the right presentation at the right lectern
- Make any adjustments to the agenda during an event
- Get live statistics on E! Centre activities

E! Presenter

The speaker's presentation environment, which enhances speaker confidence with a user-friendly touch screen system at each podium.

- Presenters can focus on their presentation, not the technology
- Each presenter can start their own presentation via the touch screen
- Simple navigation throughout each presentation
- Easy integrated highlighting tool
- Useful onscreen timer
- No USB sticks at the lectern, so no risk of viruses
- Full focus on the presentation and the audience

E! Cast

A combination of solutions to stream your presentations during or after the event.
Any place, any device, any time, any audience.

- Broadcast any event 'live' via webcast
- Replay recorded content online
- Distribute recorded presentations via USB sticks
- Real-time overflow of any session to another room
- Glance at any presentation from the VIP or boardroom
- Enrich streaming content with complementary data
- Display streaming video via E! Signage screens at the venue

E! Signage

Professional, dynamic and always up-to-date narrowcasting solutions. Providing personalised and real-time content at your location.

- Reach your audience with strategically placed screens
- Well designed templates to communicate your messages
- Easily update and distribute content to each screen
- Display scheduled and customised information
- Connect your own data for automated updates
- Integrated wayfinding applications for walking directions
- 24/7 monitoring and updates of each screen

E! Posters

The digital equivalent of 'poster sessions'. Clearly displayed electronic posters and abstracts to browse, search and read.

- Substitute to the original poster walks
- Convenient upload and process of the content
- Various display formats such as touchscreens or laptops
- Any numbers of E! Posters to match the number of attendees
- User-friendly interface in congress style and sponsor banners
- Electronic form to contact the poster author
- Statistics report of browsing behaviour

E! Kiosk

An area where visitors to an event or congress can access the internet and use business centre services.

- Fully secured internet corners with printing facilities
- Technicians to ensure smooth running of operations
- Option for PCs, laptops or kiosks facilities
- System security management to maintain functionality
- Content Filter to block unwanted web pages
- Time controlled access
- Temporary business centre with service orientated staff
- All business equipment optional such as: copiers, fax machines etc.

E! Visitor

Additional services to engage and serve visitors before, during and after a congress or event.

- Voting system via SMS or Twitter feeds
- 'Mobile Apps' with live streaming and agenda updates
- Event based communities and social network services
- Smart mobile devices to engage every visitor
- Personalised narrowcasting solutions via RFID
- Collect interesting information using NFC tags
- Integrating established third party solutions in smart presentation formats
